DRT™ RapidATO

We Champion, Build, and Modernize IT Solutions that Enable Agencies to Help Americans.

To deploy those solutions, we need to first break through the cumbersome Authority to Operate (ATO) process… now we can and FAST, with DRT Rapid ATO.

The ATO process requires enormous amount of documentation, is a complex process that is unnecessarily taxing to navigate, and distracts your business management teams from their core focus.

DRT Rapid ATO is Delivering the Future Today

**A highly automated security accreditation platform that will:**

- Provide Business Stakeholders an accurate and timely view on the security accreditation process
- Provide IT Development teams flexibility to select pre-approved technologies and shared services
- Evolve towards a Continuous Authority to Operate model, reducing risk
- Integrate security compliance workflow with IT Systems development workflow

Such a platform will enable the agency to:

- "Start" ATO activities early during IT systems planning – "Shift Left"
- Reduce time to achieve ATO for IT systems that already follow agency guidelines
- Prepare security compliance readiness for Cloud migration
- Reduce SSP documentation burden on all teams

DRT. RapidATO

Innovation and Standards Empowers DRT Rapid ATO:

- NIST released OSCAL in June 2020, which provides digital standards for automation of the security accreditation process.
- FedRAMP will provide their ATO packages in OSCAL format, making all SSPs machine readable.
- DRT is developing an OSCAL compliant security accreditation platform that delivers the future.
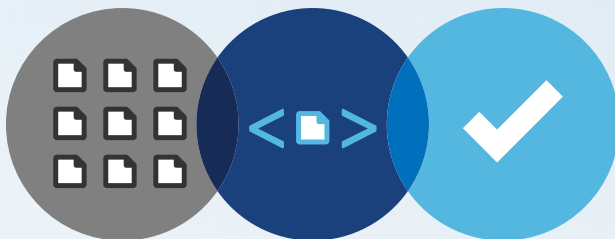

We are inviting you to participate in our DRT Rapid ATO Early Adopter Program.

As an Early Adopter, you'll play a crucial role in the success of the new product that will make security accreditation faster and continuous and empower you to build what you want on the tech you want.

Early Adopters Will:

- Receive a sample set of your SSPs converted into OSCAL format
- Establish a high level strategy for adopting OSCAL in your Agency
- Leverage our development effort as your market research
- Accelerate your understanding of how OSCAL profiles work
- See your ideas and suggestions incorporated in each build version
- Be informed of how we're updating the product to be the most perfect product for you
- Be part of the major innovation move in the Government IT space

Let Us Show You What's Possible!
